

Software that makes transport smart.

About Saga Tenix

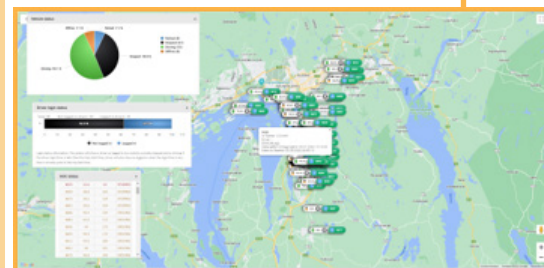

Tenix (Saga Tenix) is a SaaS company that offers technology to bus and transport companies. This technology helps companies analyze and understand how their vehicles are operating.

Tenix has customers both in Norway and internationally. With 1 out of 4 buses using Tenix's solutions in Norway, the systems are proven to help companies manage their fleets in their daily operations.

Bus/Fleet

Comprehensive overview of your entire vehicle fleet.

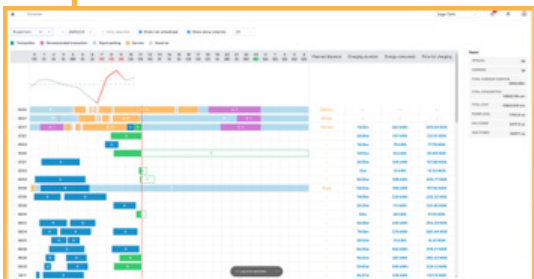

- Live map (RTIS)
- Automatic Tachograph download
