MOBILE HEATING SOLUTIONS

STROCO 35.02 M

STROCO 35.02 M is just the right heating solution for buses, boats and special vehicles. The heater is supplied as standard with electronic fault indication and motor regulation to provide cleaner combustion. STROCO 35.02 M is approved to burn diesel/HVO, bio-diesel, ethanol and RME fuel.

ADVANTAGES:

- Improved operating economy
- Eco-friendly solution - uses both diesel/HVO, bio-diesel, ethanol as well as RME fuel
- No starting difficulties
- No condensation water on windows
- The passenger will never come to a cold bus
- No cold-start wear
- Rapid return on investment

SYSTEM DESCRIPTION

STROCO 35.02 M is equipped with a stainless combustion chamber. It is supplied complete with a built-in circulation pump and automatic with undervoltage relay and motor regulation.

Only approved components are used. The heater is fitted with a complete electronic security system such

as flame super vision by means of a photoelectric sensor and over-temperature safeguard, which re-establishes the contact through applying light pressure. The brushless circulation pump is mounted directly on the boiler, entailing that the installation only requires 2 water connections.

TECHNICAL DATA:

Heating effect:	30 kW	Length:	570 mm
Efficiency: approx.	87%	Width:	245 mm
Circulation pump:	6000 l/hour at 0,4 bar	Height:	234 mm
Fuel consumption:	2,66 kg/hour	Weight:	31 kg incl. circulation pump
Operating voltage:	12/24V
