**switchio**

Switch to **Switchio**® and enjoy the ease, security and savings of contactless EMV ticketing in public transport.

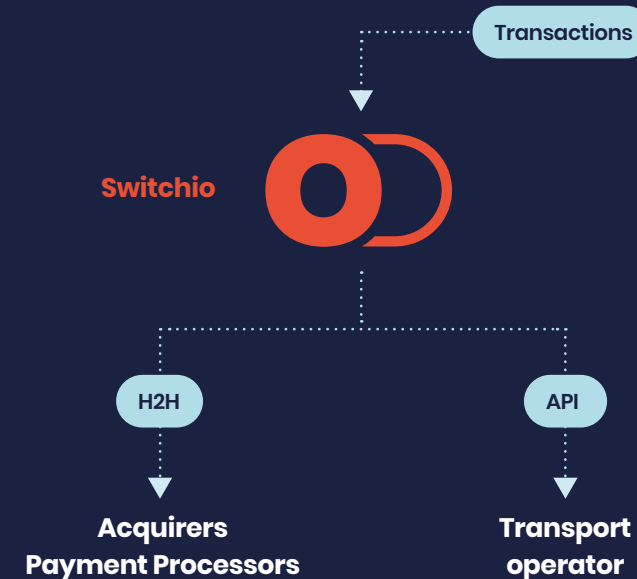

# Transport

solutions by **MONET +**

# Switchio is a comprehensive platform for contactless EMV ticketing in public transport.

We help transport operators deliver a more comfortable public transport experience to their customers. Our platform results in significant cost savings and reduces an operator's environmental footprint.

## Benefits of contactless ticketing

### Seamless travel

Contactless ticketing facilitates seamless travel across transport modes and geographic boundaries

### Safe & comfortable

In a world touched by a global pandemic, contactless ticketing is preferred by most travellers

### Savings for passengers

Contactless technology automatically calculates the most optimal fare available to a customer

### Lower costs for operators

Contactless ticketing and fare collection leads to significant cost savings for transport operators

### No ticket needed

There is no need for a ticket – a bankcard, smartcard, phone or a smart wearable will do the trick

### Watch & Explore

Supported HW platforms

## Proven solution for diverse environments

**Czechia:** Prague, Brno, Ostrava and other 60+ PTO's  
**Poland:** Tychy

Switchio Transport facilitates contactless fare collection also in **Central America** and **West Africa**.

## Cities across the globe are growing,

and with them the number of people using public transport. Increased demand for public transport requires intelligent solutions. Contactless ticketing is one such solution.
