

## **Tenix Maintenance**

Tenix Maintenance helps streamline maintenance processes. The Tenix Maintenance app is available for drivers, cleaners or suppliers etc. to report issues using pictures to the vehicle workshop. The vehicle workshop can then prioritize and manage the issues on their desktop.

## **Key Features**

- Online maintenance system, regardless of vehicle brand
- Available and user-friendly
- Report issues directly with pictures via the app
- Everyone has the same information/overview

Vehicles must always be available, which means that the time spent in the workshop must be as short as possible.

Tenix maintenance supports vehicle error reporting while on route. With this the workshop can prioritize and efficiently solve these errors.

## Арр

Errors are easily reported by the vehicle driver in the mobile app. In the app, the driver will also receive information about already registered faults and planned vehicle actions, such as service.

By adding images taken directly in the mobile app to the bug report, processes can be handled efficiently.

## Desktop

In the Tenix Maintenance desktop, cases can be followed, managed, prioritized and analyzed. Total overview of the workflow and detailed vehicle information.
